DETAILED ACTION

This office action is in response to an amendment filed 1/31/05. Claims 4-6, 8, 10, 11 and 14-20 have been cancelled. Claims 1 and 21 have been amended. Claims 1-3, 7, 9, 12, 13 and 21-24 are pending in this application.

Response to Amendment

Any rejection of Record in the previous action not addressed in this office action is withdrawn. There are new grounds of rejection herein that were not necessitated by applicant's amendment and therefore, this action is not final.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 is vague and indefinite in that the metes and bounds of "the conversion of the three-stranded structure to a double-stranded structure is done by a nucleic acid modification enzyme" are unclear. The specification teaches that the triple-stranded structure can be converted into a double-stranded structure either by 1) transfection into a prokaryotic or eukaryotic cell or 2) using a nucleic acid modification enzyme in a test tube. In light of the teachings of the specification, it is unclear if the conversion "done by a nucleic acid modification

Art Unit: 1636

enzyme" occurs in the cell or in a test tube. If the nucleic acid modification enzyme is in the cell, this limitation lacks support in the specification, which does not teach the method of conversion into a double stranded structure following its transfection into the cell. If the conversion occurs in a test tube, it is unclear how the conversion can occur simultaneously in a test tube and through introduction into a cell.

Conclusion

Claims 1-3, 7, 9, 12 and 21-24 allowed.

Claim 13 is rejected.
